

# Download Honda Accord Power Window Terminals

1992 Honda Accord LX. Power Windows don't work. The fuses and relay in the front motor compartment are fine, but no power at the fuses [Relay has been replaced]. The window fuse box at the drivers side inside are fine and have power. The wiring connectors to the window switches are all connected.6. Move the power window all the way down using the power window DOWN switch. 7. Pull up and hold the power window UP switch until the power window is all the way up, then continue to hold the switch for several seconds. 8. Confirm that the power window control unit is reset by using the power window AUTO UP and AUTO DOWN function. When something goes wrong with your electrical parts, or certain parts get damaged or broken, it is recommended to take your auto to a reliable mechanic. In case you need a new cruise control unit or a light switch, air bag parts or a defroster, you are welcome to browse for these and much more in our variety of Honda Accord electrical parts. If your power window got stuck in the down position and you know it's just the switch and your motor is good, or you just want to check, get a couple pieces of wire, any wire small enough to fit ...
