Information Technology And Law Series

Information technology law (also called "cyberlaw") concerns the law of information technology, including computing and the internet. It is related to legal informatics, and governs the digital dissemination of both (digitalized) information and software, information security and electronic commerce. aspects and it has been described as "paper laws" for a "paperless environment". De-identification is the process used to prevent a person's identity from being connected with information. For example, data produced during human subject research might be de-identified to preserve research participants' privacy.. When applied to metadata or general data about identification, the process is also known as data anonymization. Common strategies include deleting or masking ...
